Results of the project

# TELEREH-HF

## Telemedicine in comprehensive care over the patients with heart failure

### Chances and challenges

**6 December 2019**

**Golden Tulip Hotel**  
Towarowa 2 St., 00-811 Warsaw

Project manager:

Dr hab. n. med.  
Ewa Piotrowicz

Registration  
of participants  
via an online  
form at: [www.ikard.pl](http://www.ikard.pl)

The project is financed by the National Center for Research and Development under the program of STRATEGMED "Prevention and treatment of civilization diseases" in connection with the implementation of the project "The use of telemedicine technologies in a new model of organization and implementation of comprehensive rehabilitation of patients with heart failure TELEREH-HF (multicenter study)".

Partners:

6 December 2019 at 10 a.m.

# The results of the world's first randomized, multicenter study

**TELEREH-HF**

**Hybrid telerehabilitation is an effective and necessary, but  
insufficient procedure in long-term care of patients with  
heart failure.**

The program includes lectures and discussion panels dedicated to the use of telemedicine in the long term, coordinated care for patients with heart failure.

**Participation of experts from Poland  
as well as from Germany and the USA.**

Registration of participants  
via an online  
form at: [www.ikard.pl](http://www.ikard.pl)
